

Cleaning oil for oil-based tempering machines Mannol 9900

SCT-Mannol 9900 is a cleaning oil that dissolves and neutralizes oil deposits and impurities.

Removes particles caused by wear of internal components.

Cleans the oil supply system, valves, oil pump filters.

Ensures optimal lubrication, prevents contamination of new oil with old oil residues.

Its high-performance cleaning additives dissolve deposits and resins, ensuring their removal when draining the used oil.

It can be mixed with all conventional and synthetic types of heat transfer oils and can be used in all oil-fired TCU's

The contents of one bottle are sufficient for approximately 6-8 liters of thermal transfer oil.

Usage:

- heat the tempering agent to 60 Celsius degrees;
- pour the SCT-Mannol cleaning oil into the TCU;
- let the TCU run for about 15-20 minutes, then stop it;
- drain the oil, clean the oil filter and fill in new oil!

Package: 450ml
